

KOUSHIK GATTU

Senior QA Automation Engineer | AI Engineer | GenAI Application Developer
+91 9177880625 | sai4koushik@gmail.com | linkedin.com/in/saikoushikgattu | github.com/Koushik2910

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 5 years of production experience at Kroll, ITSS Global, and Temenos — now shipping production-grade AI applications. Built LexAI, a Contract Intelligence Engine using LangChain, LangGraph Corrective RAG, ChromaDB hybrid search, and Groq. Experienced across the full GenAI stack: RAG pipeline design, agentic workflows, vector retrieval, and LangSmith observability. Strong engineering foundations in Playwright, Selenium, FastAPI, and Python.

TECHNICAL SKILLS

AI & LLMs	LangChain, LangGraph, Groq (Llama 3.3-70b), Corrective RAG, Conversational RAG, prompt engineering
RAG & Retrieval	ChromaDB, HuggingFace Embeddings, BM25, CrossEncoder re-ranking, hybrid search, LangSmith
Agents	LangGraph stateful agents, ReAct agents, MCP Protocol, agentic workflows, n8n
Automation	Playwright (Python), Selenium (Java, C#), Cucumber BDD, TestNG, pytest, Page Object Model
Full-Stack	FastAPI, React, Next.js, TypeScript, Tailwind CSS, Vite, Recharts, Python, JavaScript
DevOps & Tools	Azure DevOps Pipelines, GitHub Actions, Docker, Jenkins, Git, MySQL, Postman, JMeter

AI & OPEN SOURCE PROJECTS

4 production AI projects — github.com/Koushik2910 • Portfolio: koushikgattu.lovable.app

LexAI — Contract Intelligence Engine github.com/Koushik2910/lexai-contract-intelligence

[LangChain](#) · [LangGraph](#) · [Groq](#) · [ChromaDB](#) · [HuggingFace](#) · [CrossEncoder](#) · [FastAPI](#) · [Next.js](#) · [TypeScript](#) · [LangSmith](#) · [pytest](#)

- Built production-grade AI contract analysis platform with conversational RAG, clause extraction, and risk assessment — full-stack FastAPI + Next.js, deployment-ready with security hardening
- Implemented **LangGraph Corrective RAG**: 5-node, 2-conditional-edge self-correcting pipeline that evaluates retrieval confidence and re-queries automatically when below threshold
- Engineered hybrid retrieval — ChromaDB vector search + BM25 keyword search + CrossEncoder re-ranking — for precision-optimized legal clause extraction
- LangSmith observability across all RAG nodes; shipped with 87 automated pytest tests — production engineering, not a demo

Azure DevOps QA Command Centre github.com/Koushik2910/ai-qa-platform

[React](#) · [TypeScript](#) · [FastAPI](#) · [Python](#) · [Azure DevOps REST API](#) · [Recharts](#) · [Pandas](#) · [Pydantic](#) · [Faker](#)

- 5-module QA intelligence platform: Dashboard, Defect Intelligence, Sprint Analytics, Bug Review Assistant, Test Data Factory — full-stack, production-architecture
- Azure DevOps REST API integration with PAT auth for real-time defect analytics, sprint velocity tracking, and automated quality reporting across release cycles
- Schema-aware synthetic Test Data Factory using Faker + Pandas — direct application of production QA problem-solving to AI platform engineering

Self-Healing Test Framework github.com/Koushik2910/self-healing-framework

[Python](#) · [Playwright](#) · [pytest](#) · [Groq LLM](#) · [GitHub Actions](#)

- Detects broken Playwright selectors at runtime, queries live DOM, retrieves LLM-corrected selectors with confidence scoring via Groq, and reruns tests automatically — full audit logging, CI-integrated, production-deployable

Bug Triage AI Agent github.com/Koushik2910/bug-triage-agent

[n8n](#) · [Groq](#) · [GitHub Webhooks](#) · [Jira REST API](#)

- Event-driven agentic workflow classifying bug reports by severity, priority, and team — auto-creates Jira tickets end-to-end; demonstrates LLM-powered process automation beyond test tooling

PROFESSIONAL EXPERIENCE

Azuro Technologies (Kroll) — Senior QA Automation Engineer
Kroll Restructuring Application

Hyderabad
Oct 2025 – Present

- Automating Kroll's enterprise restructuring platform across dual stacks — Selenium C# and Playwright Python — delivering 300+ automated test cases covering regression and OS patching release cycles
- Accelerated test script authoring and selector strategy using AI-assisted development (GitHub Copilot, Claude Code) — reduced boilerplate generation time and improved framework maintainability across the team

Kroll KBS-KIS: FC & KSA Portals

Feb 2025 – Oct 2025

- Built Selenium + Java + Cucumber BDD framework with POM for Kroll FC portal; automated end-to-end workflows — deal creation, asset management, user management, notices, and dashboards
- Integrated CI/CD with Azure DevOps Pipelines (PR-triggered, scheduled, regression); stabilized smoke and regression suites across frequent releases with Cucumber HTML reporting

ITSS Global — Quality Analyst
QUDS Bank (Palestine) & Suez Canal Bank (Egypt)

Bangalore
Jul 2023 – Jan 2025

- Designed and executed 400+ test cases across two core banking platforms covering web, mobile, payments, and transaction flows; built Selenium WebDriver automation reducing regression cycle time by 30%
- Reduced production defect leakage by 15% through structured smoke, sanity, and regression coverage; REST API testing with Postman; MySQL database testing for transaction integrity

Temenos — Software Engineer
Infinity Digital Banking Platform

Hyderabad
Jul 2021 – Feb 2023

- Resolved 50+ frontend and backend defects across release cycles; maintained 95% SLA adherence on customer escalations for a global-scale digital banking product

CERTIFICATIONS

- Generative AI Bootcamp** — NSDC Skill India, Jun 2026
- Generative AI Course** — Outskill, Apr 2026
- GenAI & AI Agents for QA Automation** — Udemy, 2026

EDUCATION

B.Tech, Computer Science Engineering — CVR College of Engineering, Hyderabad

CGPA: 8.76
